# Erratum to: The evidence on tiotropium bromide in asthma: from the rationale to the bedside

Dejan Radovanovic<sup>1</sup>, Pierachille Santus<sup>1</sup>, Francesco Blasi<sup>2</sup> and Marco Mantero<sup>2\*</sup>

### Erratum

After publication of the Review article [1] it was brought to our attention that the sentence at the bottom of the section entitled Tiotropium bromide (pag 5) must be corrected as follows: "Following positive large efficacy and safety trials in asthma, in 2014 the European Medicines Agency has extended the indication of tiotropium Respimat<sup>®</sup> at a dose of 5  $\mu$ g once (delivered in two inhalation of 2.5  $\mu$ g each) to patients with asthma, which was also approved in more than 50 countries, including Japan. In September 2015 the Food and Drug Administration confirmed the same indication, but with a dosage of 2.5  $\mu$ g once daily (delivered in two inhalation of 1.25  $\mu$ g each); the latter being extended for patients aged 6 and older since 16th February 2017."
